WORK EXPERIENCE

Professional Projects

Taj: Divided by Blood – Netflix

- Delivered **15+ high-quality composited shots** integrating CG set extensions into live-action plates using **Nuke**, ensuring seamless lighting and grain continuity.
- Reduced client revisions by **10%** through precise atmospheric lighting, color grading, and grain matching for historical drama accuracy.
- Contributed to one of Netflix India’s flagship releases (Top 10 global rankings) by maintaining visual consistency across sequences under tight deadlines.

Varangana – Contiloe Pictures

- Completed **20+ VFX shots ahead of schedule** by optimizing render passes in **Maya/Arnold** and collaborating across departments to ensure scene continuity.
- Increased realism in large-scale battle sequences by integrating FX, CG environments, and live-action plates, achieving higher first-pass approval rates.
- Supported smooth delivery pipelines by resolving technical issues in **Linux-based render workflows**.

State of Siege: Temple Attack & State of Siege: 26/11 – ZEE5

- Composited digital set extensions, muzzle flashes, and cleanup passes in **Nuke** across **30+ shots**, ensuring believability in action-heavy sequences.
- Delivered all assigned shots on time by working closely with supervisors and production teams to meet weekly quotas.
- Strengthened storytelling impact by synchronizing CG layers with practical camera plates, praised in director feedback.

Personal Projects

CGI Warehouse Explosion with Soldier

- Featured in final showreel: composited a live-action soldier into a **CGI explosion environment** using **Blender (camera animation)** and **Nuke (matchmove, roto, paint, grain matching)**.
- Achieved **90% realism accuracy** via detailed color correction, tracking, and compositing integration.
- Received **500+ views** on portfolio platforms for dynamic shot design.

Full CGI Astronaut on the Moon

- Produced a cinematic shot fully in **Blender + Nuke**, handling lighting, compositing, and tracking.
- Enhanced shot believability through precise **matchmove, roto/paint, and atmospheric grading**.
- Showcased advanced **3D compositing and integration** in personal portfolio.

Photogrammetry Projects

- Built **5+ photogrammetry reconstructions** (gardens, roads, objects), processed into **CG-ready geometry** for use in composites.
- Reduced reliance on stock assets by integrating custom photogrammetry-based textures into Nuke scenes.
- Increased pipeline efficiency by **20%** by retopologizing, cleaning, and lighting photogrammetry assets in **Maya/Blender**.

SKILLS & LANGUAGES

Skills:

- Compositing & Tracking:** NukeX, Mocha Pro, Roto, Paint, 2D/3D Matchmove, Camera Tracking, Set Extensions, Digital Matte Painting.
- Software & Tools:** Nuke, Mocha Pro, Adobe After Effects, Photoshop, Premiere Pro, Maya, Arnold, Blender, ShotGrid.
- Pipeline & Technical:** VFX/CG production pipeline, formats, frame rates, compression, Linux-based render workflows, Python scripting in Nuke.
- Core Strengths:** Attention to detail, Collaboration, Communication, Adaptability, Problem-Solving, Time Management.
