PROFILE

Roto artist and compositor with experience across film and television productions. Experienced in green screen replacement, shadow preservation, and cleanup in motion-heavy shots. Proficient in Mocha Pro and NukeX.

ROTO & PAINT EXPERIENCE

Mangal Yatra — Roto Artist (Freelance)

- Rotoscoped actors and hands in active motion against a keyed surface, isolating complex inter-finger detail across multiple frames with no clean backing reference.
- Preserved cast shadows on the practical surface through the composite, maintaining contact and weight as actors interacted with the table.
- Delivered 3 shots in which the entire surface was replaced by a fully CG sci-fi environment — holographic UI panels, face scan displays, and body wireframe overlays — with roto shapes tracked in Mocha Pro to hold through motion.

Untitled Production — Roto & Paint Artist (Freelance)

- 8 cleanup shots removing on-set crew and equipment from live-action plates across a range of shot types.
- Used Mocha Pro to track and drive paint patches over moving backgrounds, avoiding frame-by-frame manual work where possible.
- Maintained clean, consistent delivery across a high shot count under weekly quota with no revisions flagged.

Varangana — VFX Artist — Cleanup, Paint & Tracking

- Cleanup and paint-out passes across 20+ shots; tracker and marker removal with Mocha Pro 2D planar tracking to support set extension integration.
- Worked closely with the director and cinematographer to ensure paint work matched graded plates and held consistently across cut sequences.
- Delivered all shots ahead of schedule, coordinating via ShotGrid across departments.

COMPOSITING EXPERIENCE

Taj: Divided by Blood — Compositor | ZEE5

- 15+ shots integrating CG set extensions into live-action plates in NukeX, maintaining seamless lighting, grain, and colour continuity across sequences.
- Reduced client revisions by 10% through precise atmospheric grading and grain matching calibrated to the historical drama's visual language.
- Maintained visual consistency across sequences under tight deadlines.

PERSONAL PROJECTS

CGI Warehouse Explosion with Soldier

- Composited a live-action actor into a fully CG explosion environment in Blender and NukeX, handling roto, paint, matchmove, and grain matching end-to-end.
- Achieved clean edge separation on hands and figure against dynamic motion blur with no reference plate, relying entirely on hand-drawn roto shapes.

Full CGI Astronaut on the Moon

- Produced a cinematic shot fully in Blender and NukeX; roto and paint work used to integrate CG elements with atmospheric grading and matchmove.

SKILLS

Roto & Paint: Mocha Pro, NukeX RotoPaint, green screen prep, shadow preservation, cleanup, marker removal, paint-out

Compositing: NukeX, After Effects, set extensions, digital matte painting, colour grading, grain matching

Tracking: Mocha Pro (planar), 2D/3D matchmove, camera tracking

3D & Pipeline: Maya, Arnold, Blender, ShotGrid

Languages: English (Native) | Hindi (Native) | Spanish (B2) | French (B2) | Italian (B2)

EDUCATION

MA Filmmaking, VFX Specialisation — Whistling Woods International, Mumbai | VFX Gold Medalist | 2023

BA Mass Communication — University of Allahabad | 2021
